Notes: Data collection methods for each measure are current as of May 2, 2019. These methods may change as measures undergo specification updates and maintenance.

Measures specified for administrative data collection may use code sets that are not available for state-level reporting, such as LOINC, SNOMED, or CPT-II codes.

\* This measure is no longer endorsed by NQF.

\*\*These two measures will be discussed together.

\*\*\*19 CAHPS HCBS measures are NQF endorsed.

<sup>a</sup> ECDS data collection method includes data from administrative claims, electronic health records, case management systems and health information exchanges/clinical registries.

<sup>b</sup> There was a change to the ICD-10 coding guidelines, effective October 1, 2018, related to the codes for reporting body mass index (BMI). The change allows providers to bill for BMI codes *only* if the beneficiary has a clinically relevant condition, such as obesity. As a result, beneficiaries without a relevant condition will no longer be captured for the numerator using administrative claims.
