Agenda

• Welcome from AHRQ
• Overview of the Compendium of U.S. Health Systems
• Tour of Compendium website resources
• Compendium applications
• Questions and answers
Welcome

Daniel Miller
Agency for Healthcare Research and Quality (AHRQ)
• Health systems have proliferated over recent decades
  ► More than **half of all physicians** and **three-quarters of hospitals** are part of vertically integrated systems.

• It is critical to understand the role of systems in care delivery.

• However, most research has focused on individual care settings.
The Comparative Health System Performance (CHSP) Initiative

• In 2015, AHRQ launched the CHSP initiative to
  ► Classify and characterize health systems
  ► Identify ways that health systems organize resources to generate and adopt best practices
  ► Assess the ways that health systems incorporate knowledge from patient-centered outcomes research (PCOR) into practice
  ► Compare performance on clinical and cost outcomes

• CHSP has produced over 180 publications, listed at https://www.ahrq.gov/chsp/publications/index.html
Previous research was limited by a lack of health system data.

Created under the CHSP initiative, the Compendium of U.S. Health Systems is the first publicly available data on health systems and affiliated providers.

AHRQ plans to release annual Compendium updates and data enhancements.
Overview of the Compendium of U.S. Health Systems
The Compendium: Overview

• The Compendium includes data on:
  
  - Systems
  - Hospitals
  - Group practices

• AHRQ previously released 2016 and 2018 Compendium data

• New 2020 and 2021 data released in June 2023
The Compendium: Opportunities

- Provides data on trends and the changing landscape of health systems
- Links to other resources to aid health systems research
  - 2016 and 2018 Compendium data has been featured in many high-impact journal articles
Defining health systems

- AHRQ developed a definition of a health system that relies on existing data resources:
  - Based on provider organization ownership or joint management
  - Focuses on vertically integrated systems

A health system includes at least one hospital and at least one group of physicians that provide comprehensive care (including primary and specialty care) and are connected with each other and with the hospital through common ownership or joint management.
A health system includes at least one hospital and at least one group of physicians that provide comprehensive care (including primary and specialty care) and are connected with each other and with the hospital through common ownership or joint management.

- Organizations must have at least:
  - 1 non-federal general acute care hospital
  - 50 total physicians
  - 10 primary care physicians
Compendium system files: Data sources

- IQVIA OneKey
- American Hospital Association (AHA) Annual Survey
- Healthcare Provider Cost Report Information System (HCRIS)

They provide system information, including:
- Numbers of physicians and hospitals
- Teaching intensity
- Uncompensated care burden
New data from the AHRQ Compendium

- **Numbers of systems**
  - 2016: 626 systems
  - 2018: 637 systems
  - 2020: 629 systems
  - 2021: 635 systems

- **Increased variation in system size in 2021:**
  - Fewer and larger systems were at the top of the size distribution
  - New smaller systems were added at the bottom
Changes in provider affiliation from 2016 to 2021

Share of physicians in systems grew from 40 to 52%

Share of hospital beds in systems grew from 88 to 93%
Tour of Compendium website resources
Data sources and file structure

- IQVIA
- AHA
- MD-PPAS
- PECOS

**System**
- Sys ID

**Owner / Parent Organization**

**Group / Business Entity**
- Sys ID CCN
- Sys ID PAC ID TIN name

**Site / Practice Location**
- Sys ID Address CCN
- Sys ID Address

**Hospital**

**Hospital Site**
- Sys ID Address CCN

**Group Practice**

**Practice Site**
- Sys ID Address
List of Compendium files

• **System** file: A system-level file with one row per health system
  - Each system has a unique Compendium system ID that can link to other files

• Provider files
  - **Hospital** linkage file: A hospital-level file with one row per hospital.
  - **Group practice** linkage file: A group practice-level file with one row per group practice
    - The provider files include the Compendium system ID that links to the system file
## System-level file

CCN: CMS certification number; NP: nurse practitioners; PA: physician assistants.
System files

• Cover 2016, 2018, 2020, and 2021
• Include system type, affiliated provider counts, and location
• Include a unique Compendium ID that links to the hospital and group practice linkage files
• Data sources: IQVIA OneKey and AHA Annual Survey
Health system attributes

• The number of:
  ► Physicians (total and primary care)
  ► Outpatient centers
  ► Nursing homes
  ► Hospitals (total and general acute care)
  ► Hospital beds
  ► Hospital discharges
  ► Full-time-equivalent interns and residents

• Indicators for:
  ► Multistate systems
  ► System offers an insurance product (any product, Medicare Advantage, Medicaid managed care, Health Insurance Marketplace)
Indicators of health system types

• Safety net indicators
  ► Includes hospital with a high Disproportionate Share Hospital patient percentage
  ► Includes hospital with a high uncompensated care burden
    ‒ Systemwide measure of uncompensated care burden

• Teaching intensity
  ► Includes hospital with a major or very major teaching intensity
    ‒ Systemwide measure of teaching intensity

• Degree to which the system serves children only

• Predominantly investor-owned

Group practice linkage files: Background

- Cover 2016 and 2018
- List group practices and link to Compendium systems files
  - They include all group practices with 2+ physicians billing Medicare
  - They link the group practices and the physician NPIs billing those TINs to health systems
  - They also include PAC ID to link to external data sources

TIN: Tax Identification Number; NPI: National Provider Identifier; PAC ID: PECOS Associate Control ID
Group practice linkage files

• Data sources
  ► Medicare Data on Provider Practice and Specialty (MD-PPAS)
  ► Medicare Advantage data
  ► Medicare fee-for-service claims
  ► Medicare Provider Enrollment, Chain, and Ownership System (PECOS) data
  ► IQVIA OneKey
  ► Compendium hospital linkage file

Compendium of U.S. Health Systems

The Compendium of U.S. Health Systems includes information on U.S. health systems, defined in this analysis to include at least one hospital and at least one group of physicians providing comprehensive care, and who are connected with each other and with the hospital through common ownership or joint management. The Compendium is updated on a regular basis, with the newest files released in June 2023:

- 2021 Compendium (New)
- 2020 Compendium (New)
- 2018 Compendium
- 2016 Compendium
Accessing the Compendium on the AHRQ website

2021 Compendium Files

- **Excel File**—Your computer should automatically prompt you to open the file in a spreadsheet application to view the data.
  - [Compendium of U.S. Health Systems](#) (CSV, 77 KB)
  - [Compendium with searchable and sortable fields](#) (XLS, 94 KB)

- **Hospital Linkage File**—We recommend that Excel users download only the Excel version of the file. If Excel is used to open the CSV file, the program will automatically drop the zeros in fields with leading zeros.
  - [Excel](#) (554 KB)
  - [CSV file](#) (800 KB)

- **Technical Documentation**
  - [Technical Documentation Report](#) (PDF, 6 MB)
  - [Compendium Hospital Linkage File, Technical Documentation](#) (PDF, 469 KB)
    - [Appendix A. Non-Federal General Acute Care Flag](#) (PDF, 261 KB)
    - [Appendix B. Data Dictionary – Hospital Linkage File](#) (PDF, 262 KB)
Future Compendium updates
Compendium applications
Compendium as a springboard for research

- Valuable as a standalone resource for examining systems
- Can link to other data sources, creating possibilities to study:
  - **Physicians** (for example, IQVIA OneKey, CMS MIPS)
  - **Hospitals** (for example, AHA, CMS Hospital Compare)
  - **Patients** (for example, claims and administrative data)
  - **Geography** (for example, AHRQ SDOH database, CDC Social Vulnerability Index)
Describe health systems

- Rich in system-level information
- Can shed light on health system characteristics nationally

By the end of 2016, there were 626 health systems* in the United States.

- **626 Health Systems**
  - **162 (25.9%)** are high-teaching intensity
  - **31 (5.0%)** predominantly serve children
  - **221 (35.3%)** include at least one hospital with a high uncompensated care burden
  - **18 (2.9%)** comprise predominantly investor-owned hospitals
  - **43 (6.9%)** include hospitals in 3+ States
  - **193 (30.8%)** include at least one hospital with a high percentage of low-income patients

---

Link the Compendium to other data sources

- Facilitates granular analysis on topics such as size and ownership:
  - What type of health system ownership is most common?
  - How large are health systems?
  - Does health system size vary by ownership type?

Analyse changes over time

- Facilitates analysis of health system variation over time
  - How did physician integration with systems change from 2016 to 2018?
  - Does physician alignment with systems vary by specialty?

Explore performance of physicians in health systems

- Linking to data from the Merit-based Incentive Payment System (MIPS) helped answer whether clinicians affiliated with health systems had better performance ratings than their peers.

Test hypotheses about system performance

- Linking to **hospital cost and quality data from CMS** helped answer whether system providers perform better than nonsystem providers under an alternative payment model that incentivizes high-quality, cost-efficient care.
