SECTION A

PUBLICLY HOSTED EFFORTS

1. Federal Efforts

Benefits.Gov

Description	Benefits.gov is the official benefits website of the U.S. government. Implemented in 2002, it informs citizens of the benefits they may be eligible for and provides information on how to apply for assistance (a later, independent step that users must initiate), and provides links to relevant websites for obtaining and submitting applications. Users can browse information by category, state, or federal agency.
Key benefit programs	TANF; SNAP; Medicaid; CHIP; WIC; SSI/DI; LIHEAP; EITC; school meal programs; federal housing assistance programs; federal child care assistance; veteran pension assistance; assistance for homeless veterans
Other benefit programs	Medicare; child support; career development; counseling; disaster relief; education and training
Key technological components	Online screener/benefits calculator
Other key components	None known
Target population	General low-income population
Geographic reach	National
State/s (abbreviation)	All states
Locality (cities or counties)	
Selected sources of	http://www.benefits.gov/
information	http://www.nlc.org/ASSETS/E2DF31BA4AFF4ADEB19BA434142B
	http://www.0545/iyefscreeningtools.pdf
	http://www.benefits.gov/static/benefits/en/html/progress-report- 2008.pdf

SSA BEST (Benefit Eligibility Screening Tool)

Description SSA's online benefit screener

Key benefit programs SSI/DI; veteran pension assistance

Other benefit programs Medicare

Key technological components Online screener/benefits calculator

Other key components None known

Target population General low-income population

Geographic reach National

State/s (abbreviation) All states

Locality (cities or counties)

Selected sources of http://www.benefits.gov/ssa

information

2. State Efforts

Alabama

Insure Alabama

Description This is the state online application for Medicaid and CHIP.

Key benefit programs Medicaid; CHIP

Other benefit programs None known

Key technological components
Online application that can be sent electronically

Other key components None known

Target population General low-income population

Geographic reach Statewide

State/s (abbreviation) AL

Locality (cities or counties)

information

https://insurealabama.adph.state.al.us/

Printable application also available online at:

http://www.medicaid.alabama.gov/apply/apply_application.aspx?tab=3

Alaska

Alaska application for services

Description	Printable online multiple benefit application
Key benefit programs	TANF; SNAP; Medicaid; federal child care assistance
Other benefit programs	General assistance
Key technological components	Online application that is printed and submitted on paper
Other key components	None known
Target population	General low-income population
Geographic reach	Statewide
State/s (abbreviation)	AK
Locality (cities or counties)	
Selected sources of information	http://dpaweb.hss.state.ak.us/e-forms/pdf/gen50b-packet.pdf

Arizona

Health-e-Arizona (see also One-e-App in Section B)

Description of effort	Health-e-Arizona is an on-line ap	oplication for Arizona residents to

apply for medical coverage and nutrition and cash assistance. The state has adopted One-e-App (renaming it Health-e-Arizona) as its sole effort to promote benefits access through web-based technology. In addition, staff at nonprofit organizations may use Health-e-Arizona to

screen families and help them apply for benefits.

Key benefit programs TANF; SNAP; Medicaid; CHIP

Other benefit programs Medicare Savings Program

Key technological components Online application that can be sent electronically; online

screener/benefits calculator

Other key components Application assistance

Target population General low-income population

Geographic reach Statewide

State/s (abbreviation) AZ

Locality (cities or counties)

Selected sources of

information

https://www.healthearizona.org/app/Login.aspx?&Lang=EN

http://www.lewin.com/content/publications/OneEAppFinalRpt.pdf

Arizona also has online, printable multiple benefit program applications for (1) SNAP, TANF, Medicaid, and child care assistance, and (2) Medicaid

(families and children) and CHIP at:

https://www.azdes.gov/appforms.aspx?category=999999

http://www.azahcccs.gov/applicants/application/AcuteCare.aspx)

Arkansas

Access Arkansas

Description of effort	State online screener for 20 programs, with capability to also submit applications online for some of these (including SNAP, TANF, Medicaid, CHIP, child care assistance, and the Medicare Savings Program).
Key benefit programs	TANF; SNAP; Medicaid; CHIP; school meal programs; federal child care assistance
Other benefit programs	Medicare Savings Program; home- and community-based services; refugee assistance; early intervention; vocational rehabilitation services; older blind services; CACFP
Key technological components	Online application that can be sent electronically; online screener/benefits calculator
Other key components	None known
Target population	General low-income population
Geographic reach	Statewide
State/s (abbreviation)	AR
Locality (cities or counties)

	http://www.arkidsfirst.com/ARKidsApplic_english.pdf
	Child care assistance at
	http://www.state.ar.us/childcare/familysupport/apply.html

California

Benefits CalWIN (California Work Opportunities and Responsibility to Kids Information Network)

Description of effort	In 2010,	the Welfare Client Data Systems	(WCDS) CalWIN consortium
-----------------------	----------	---------------------------------	--------------------------

implemented Benefits CalWin, an online application clients can use to apply for public benefits. Benefits CalWin is fully interfaced with the CalWIN system (the primary eligibility calculation, determination and authorization system) so applicant and recipient information is

automatically populated from the screener/application into the CalWIN system. Users are able to determine which program options are available in different counties, and may be redirected to the C4yourself web pages for those counties. Hewlett Packard was a key partner in developing this

California effort.

Key benefit programs SNAP; Medicaid

Other benefit programs General assistance

Key technological components Online application that can be sent electronically; online

screener/benefits calculator; application and eligibility systems

integration

Other key components None known

Target population General low-income population

Geographic reach Multiple localities

State/s (abbreviation) CA

Locality (cities or counties) Counties of: Alameda, Contra Costa, Fresno, Orange, Placer,

Sacramento, San Diego, San Francisco, San Luis Obispo, San Mateo, Santa Barbara, Santa Cruz, Solano, Sonoma, Tulare, Ventura, Yolo

Health-e-App

Description	Health-e-App is the State of California's	publicly accessible web-based

enrollment application for CHIP and Medicaid for children and pregnant women. It was piloted in 2001 in San Diego and implemented statewide in 2002. Originally used by state Certified Application Assistors across California to submit applications on behalf of families electronically, Health-e-App has been available since 2010 for self-service use as well and includes a benefits screener. Health-e-App is the precursor to One-e-App (described separately in Section B). The California HealthCare Foundation (CHCF) developed Health-e-App in consultation with Deloitte and licensed it to Social Interest Solutions (SIS), a nonprofit organization dedicated to leveraging technology innovation to improve consumers'

Key benefit programs Medicaid; CHIP

Colorado

PEAK (Program Eligibility and Application Kit)

Description

Implemented in 2004, PEAK is Colorado's online screener for

TANF/SNAP/Medicaid and other programs in CO. The Colorado Benefit Management System is the eligibility system rules engine that supports it, replacing the legacy mainframe system. PEAK will soon incorporate an online application; planning for this component began in 2009. Along with the online application, CBOs will also soon begin conducting outreach and application assistance using PEAK. Clients will be able to use the online system to check the status of their benefits. The effort leverages concepts from PA Compass, developed for PA Department of

Public Welfare in consultation with Deloitte.

Key benefit programs

TANF; SNAP; Medicaid; CHIP

longer available.

Florida

ACCESS (Automated Community Connection to Economic Self-Sufficiency) Florida

Desc	 , , , , , , , ,	

In 2004, Florida's Department of Children and Families (DCF) modernized its approach to administering the SNAP, cash assistance, and Medicaid programs. Known as ACCESS Florida, this new business model changed both the way DCF staff processes applications and manages caseloads, and how clients interact with DCF. The new model was designed to simplify the client application process, reduce administrative costs and increase client access to services.

The state designed its online application for benefits internally, and also incorporated document imaging efforts and several call centers throughout the state. Caseworkers now share the work throughout the state, performing specific functions (intake, case management, etc.) rather than working with a specific caseload. Additionally, customers can receive help completing their online applications from some partner organizations in the community (such as community action agencies, libraries, and local United Way agencies).

Key benefit programs TANF; SNAP; Medicaid

Hawaii

Real Choices Hawaii (See also Real Choices Hawaii in Section B)

Descri	pt	ion
--------	----	-----

This website for Hawaiians in need of disability services or long-term care includes 4 components: (1) "services," which provides online access to program applications; (2) the Benefits Finder, which is an online screener; (3) "learn about," a series of links to program information and resources; (4) "my choices," a login area that allows users to retain their data for pre-filling other application forms later; and (5) "community," a forum and discussion area.

The Benefits Finder, which was added to the Real Choices website in 2010, is powered by the National Council on Aging and uses AssistGuide, Inc. (AGIS Network) products. The effort is supported through two grants—one from CMS) and one from DOL's Employment and Training Administration. While the site is accessible to people of all ages and abilities, it caters to seniors and individuals with disabilities.

In Louisiana, AGIS Network has launched a similar effort (https://www.louisianaanswers.com/site/1/home.aspx), which includes online resource information and links to program applications that can be printed.

Indiana

Indiana Division of Family Resources

	•
Description	DFR maintains a website where customers may screen or apply for benefits, as well as report changes and check benefit status. Application data interfaces directly with the eligibility system to streamline tasks for workers. The effort began in 2007. Currently, five of the state's eight regions are using the online application (http://www.in.gov/fssa/dfr/2999.htm), and the state plans to add the online capabilities to the remaining two regions in the future. This effort was developed using Curam software.
Key benefit programs	TANF; SNAP; Medicaid
Other benefit programs	State low-income health insurance program
Key technological components	Online application that can be sent electronically; online screener/benefits calculator; application and eligibility systems integration
Other key components	None known
Target population	General low-income population
Geographic reach	Multiple localities
State/s (abbreviation)	IN
Locality (cities or counties)	5 of the state's 8 regions; the other 3 use paper applications and traditional business processes.

Kansas

SRS (Department of Social and Rehabilitation Services) Online

Descri	

Kansas online multiple benefit application.

Also under development is the Customer and Provider Portal (CAPP) project, which is a partnership between SRS and the Kansas Department of Health and Environment (KDHE). With the common goal of being customer-centered and enhancing workforce efficiency, the CAPP project was initiated to create a web portal for both customers and providers. The CAPP project includes two essential components: a Customer Portal and a Provider Management System that will include a provider portal and a professional development registry. Oracle has been a key contractor in developing this effort.

The Customer Portal will allow a customer to enter information to do screening and/or apply for benefits the following programs: TANF, SNAP, refugee assistance, and/or child care. The portal will automatically register customers and pass customer entered information into agency eligibility systems through automated or manual processes based on applied business rules. The Provider Portal component of the Provider Management System will provide a point of access for Child Care providers to apply on line with both agencies.

Key benefit programs

TANF; SNAP; federal child care assistance

Other benefit programs

Vocational rehabilitation services; child support

Key technological components

Online application that can be sent electronically; online screener/benefits calculator; application and eligibility systems

integration in development

Louisiana

Louisiana DSS multiple benefit application

Louisiana DSS multiple benefit application		
Description	State online benefit application. Allows information from the online application to interface directly with the eligibility determination system.	
	In conjunction with this, the state Department of Social Services (DSS) has implemented a "No Wrong Door" effort. Residents may now apply for SNAP, child care assistance, TANF, and the kinship care subsidy at any Office of Family Support (OFS) office across the state. Previously, applicants had to apply at the OFS office in the parish of their residence.	
Key benefit programs	TANF; SNAP; federal child care assistance	
Other benefit programs	Kinship care subsidy program	
Key technological components	Online application that can be sent electronically; application and eligibility systems integration	
Other key components	None known	
Target population	General low-income population

Massachusetts

Virtual Gateway

Virtual Gateway	
Description	MA online screener (for multiple benefits) and application, which leverages concepts from PA COMPASS, developed by PA Department of Public Welfare in consultation with Deloitte, along with other features. The Virtual Gateway enables providers to submit on behalf of clients a single online common intake application for up to 13 different services and enables clients to submit on their own behalf an electronic application for SNAP. In addition to providing service to program applicants, the system enables program recipients to check the details of their case by using an online account. The effort was launched in 2004.
Key benefit programs	SNAP; Medicaid; CHIP; WIC; EITC; school meal programs; federal child care assistance
Other benefit programs	Long-term care; women's health network; Department of Mental Retardation services, Massachusetts Rehabilitation Commission services, veteran services, Massachusetts Commission for the Blind services, Massachusetts Commission for the Deaf/Hard of Hearing services
Key technological components	Online application that can be sent electronically; online screener/benefits calculator
Other key components	Application assistance
Target population	General low-income population

New York

ACCESS NYC

Description	ACCESS NYC is an online screening and application tool that allows New
	York City residents to quickly and easily determine their potential
	eligibility for 35 city, state and federal benefit programs across 15
	different agencies. The single point of entry was designed to allow city
	residents to pre-screen for those programs anywhere, anytime, in at
	least seven different languages. ACCESS NYC also was designed to
	provide essential information about the application process, including
	simplified steps on how to apply, office location details, and information
	about required documentation. Users may also print blank or partially
	populated application forms and may submit electronic applications for
	some programs. While ACCESS NYC is a self-service tool, community-
	based organizations are trained to provide city residents with assistance
	in using the tool. The effort was implemented in 2006 and developed using Curam software.
Key benefit programs	TANF; SNAP; Medicaid; CHIP; WIC; LIHEAP; EITC; school meal programs;
noy benefit programs	Federal housing assistance programs; federal child care assistance
Other benefit programs	Property tax and rent rebate programs; state low-income tax credits;
	county- or city-level human services assistance and employment
	programs; home- and community-based services; Head Start; senior
	services; out of school time programs; universal prekindergarten
Key technological components	Online application that can be sent electronically; online application that
	is printed and submitted on paper; Online screener/benefits calculator

myBenefits

Description	myBenefits is an online eligibility screener and application tool. It guides
	users through a list of questions to determine whether or not they are
	eligible for assistance. If they are determined to be eligible, they are
	provided with a list of the information that they must take to the
	assistance office so their eligibility can be confirmed. The application
	can be completed on a home computer, and there are also myBenefits
	kiosks located in many of the county assistance offices and some
	community organizations. Applicants who might qualify for programs
	other than the one for which they are applying will be identified and
	asked whether they want to apply for additional benefits. Depending on
	where in the state the user resides, electronic submission of applications
	may be possible. The site also enables benefit recipients to check the
	status of their benefits. This effort is maintained by the New York State
	Office of Temporary and Disability Assistance (OTDA). This effort
	leverages concepts from Wisconsin ACCESS, developed by Deloitte.
Key benefit programs	TANF; SNAP; Medicaid; WIC; LIHEAP; EITC; school meal programs
Other benefit programs	Prescription drug assistance; nutrition education, state health insurance
	plans, assistance for veterans
Key technological components	Online application that can be sent electronically; online application that
	is printed and submitted on paper; online screener/benefits calculator

North Carolina

ePASS (Electronic Pre-Assessment Screening Service)

Description	This is an online screening tool for multiple benefits in North Carolina.

Implemented in 2010, it is the first part of a larger modernization effort, which will eventually include Medicaid, enable individuals and families to submit applications electronically, and integrate the online application data with the state's revamped eligibility system. Both ePass and North Carolina

Families Accessing Services through Technology (NC FAST), a new

integrated eligibility and case management system, were developed using

Curam software.

Pennsylvania

COMPASS (Commonwealth of Pennsylvania Access to Social Services)

Description	Pennsylvania Department of Public Welfare's online program that allows
Description	users to apply and renew coverage for social services themselves (and
	the name of the eligibility determination system).
	COMPASS was launched in 2001, and offered a joint application for
	Medicaid and CHIP. In its current form, the site offers applications and
	renewal options for a variety of programs, and is regularly reviewed by
	the Department of Public Welfare and Insurance. COMPASS is also linked
	to a client information database that allows the site to integrate existing client level data with new data to help facilitate the process.
	Deloitte has been a key partner in assisting Pennsylvania with
	developing and implementing this effort. Community based
	organizations also partner with the state to provide outreach and application assistance through this tool to customers.
	•

Utah

Utah Helps/eREP (Electronic Resource and Eligibility Product)

	3 . 3
Description	eREP is an automated, enterprise solution that modernizes and integrates eligibility and benefit calculations for more than 60 social service programs. Utah Helps is the public-facing portal through which the public applies for benefits online. A key motivation for the effort was to have workers at multiple agencies administer multiple programs so that clients do not have to go from agency to agency to receive benefits. Only some of the programs included in eREP also have online application (TANF, SNAP, Medicaid, CHIP). eREP was developed using Curam software and implemented in stages. The first module, Utah Cares (a referral Web site to help Utah residents find state and community services) went live in November 2003. The second component, InfoSource (an online policy reference manual for TANF, food stamps, child care and Medicaid programs with links from the eREP system rules) launched in April 2004. Utah began piloting an eligibility screening module at the end of 2004, which resulted in Utah
Key benefit programs	Helps. System enhancements continued through 2009. TANF; SNAP; Medicaid; WIC; LIHEAP; school meal programs; federal child care assistance
Other benefit programs	General assistance; separate state welfare programs; unemployment insurance; child welfare; job training; Head Start
Key technological components	Online application that can be sent electronically; Application and eligibility systems integration

Washington

Washington Connection

	washington ournection
Description	This is an online client screening and application portal developed in Washington by the Department of Social and Health Services (DSHS). Implemented in 2011 to replace an earlier version of an online application, this tool allows for online application for DSHS programs such as TANF, SNAP, and Medicaid, but will be expanded to include other programs over time. (The old application is currently still available, and will be is phased out in the future).
	Additional system capabilities (such as special logins for partner agencies that assist clients) will be implemented in spring 2011.
Key benefit programs	TANF; SNAP; Medicaid; WIC; LIHEAP; EITC; federal housing assistance programs; federal child care assistance; veteran pension assistance; assistance for homeless veterans
Other benefit programs	General assistance; Medicare; child support; long-term care; drug and alcohol treatment, FAFSA, family planning, vocational rehabilitation
Key technological components	Online application that can be sent electronically; online screener/benefits calculator
Other key components	Outreach conducted by for-profit or nonprofit partners

Benefits Checkup

Description	Launched in 2001, Benefits Checkup is a an online benefits screening
	tool designed by the National Council on Aging that uses AGIS Network
	products to connect older people with benefits that are particularly
	relevant to them. It includes more than 2,000 public and private benefits
	programs in all 50 states and the District of Columbia. At the end of a
	screener, the tool lists the programs for which the user may be eligible
	and provides contact information for the agency closest to his or her zip
	code. Even if an applicant screens for only one program (such as Extra
	Help), the tool returns results for multiple programs for which the user
	may be eligible. AARP's "benefits quicklink" feature connects to Benefits
	Checkup, providing another portal through which seniors can make the most of this effort.
Key benefit programs	SNAP, Medicare Extra Help, SSI/DI, LIHEAP, federal housing assistance
	programs, veterans' pension assistance
Other benefit programs	Prescription drug assistance, Medicare, programs for the deaf and blind,
	adult protective services

Bridge to Benefits		
Description	Bridge to Benefits is a multi-state project funded by Children's Defense Fund Minnesota. Launched in Minnesota in 2007, it now also operates in Montana, North Dakota, and South Dakota. Its goal is to improve the well-being of families and individuals by linking them to public work-support programs and tax credits. Users can identify programs for which they may be eligible by visiting the Bridge to Benefits homepage and clicking on their state to access the eligibility screening tool. While anyone can visit the website, use the screen, and find information on and applications for the various programs, they can also take advantage of Bridge to Benefits' partnerships with community organizations (77 in Minnesota as of 2009) that use the website to screen their clients. Other community organizations (16 in Minnesota as of 2009) serve as application assistance partners. These organizations agree both to accept email referrals via the Bridge to Benefits website from the screening organizations and to follow up with families who need help completing the applications for one or more programs.

Disability Benefits 101

Descri	ntion	
DUSCH	puon	

Disability Benefits 101 is a website on health coverage and benefits programs for workers and job seekers with a disability. Launched in California in 2004 by the World Institute on Disability's Employment Disability Benefits Initiative, formerly the California Work Incentives Initiative., Disability Benefits 101 provides easy-to-read descriptions of state, federal, and private benefit programs. It also includes a series of benefits calculators. These allow users to enter information about their circumstances and see how changes in employment and living arrangements might affect their income and eligibility for benefit programs. The website is available in different iterations in California, Michigan, Minnesota, and New Jersey. But the only screening capability in the Michigan and New Jersey versions is a benefits-to-work calculator that provides information for disability benefit recipients on how their current benefits (income and health coverage) would change if they took a job. The benefits-to-work calculator is designed for job seekers who are 18 to 65 years old. The California and Minnesota versions include screeners for a range of benefit programs including TANF, SNAP, Medicaid, SSI/DI, EITC, LIHEAP, federal housing assistance, federal child care assistance, General Assistance, Medicare, prescription drug assistance, separate state welfare programs, and home and communitybased services.

Key benefit programs included

SNAP, Medicaid, SSI/DI, LIHEAP, EITC, federal housing assistance

programs, federal child care assistance

Other benefit programs included

General Assistance, prescription drug assistance, separate state welfare programs, Medicare, home- and community-based services, Plan for Achieving Self Support (PASS), Individual Development Accounts (IDAs),

Ticket to Work, Workplace Personal Assistance, Pell Grants

Earn Benefits

Description	EarnBenefits works in three stages to connect low-wage workers to a range of income-enhancing public and private benefits: (1) marketing and education to inform workers about public benefits; (2) eligibility screening and application assistance provided by EarnBenefits
	representatives in community organizations via EarnBenefits Online (a web-based tool that streamlines eligibility screening for benefits, application submission, and tracking of applications submitted to local agencies that administer benefits); and (3) benefits management assisting clients with recertification and financial management. Before developing EarnBenefits Online, EarnBenefits used HelpWorks as its web-based screening tool (see page 77).
	EarnBenefits is operated by Seedco, a national nonprofit organization that works with local community partners to create economic opportunities for disadvantaged job seekers, low-wage workers, and neighborhood entrepreneurs. The effort was initially launched in New York City in 2003 but has expanded to other cities and states.
Key benefit programs	TANF, SNAP, Medicaid, CHIP, WIC, SSI/DI, LIHEAP, EITC, school meal programs, federal housing assistance programs, federal child care assistance
Other benefit programs	Prescription drug assistance, separate state welfare programs, state low-income tax credits, county- or city-level human services assistance programs, unemployment insurance, home- and community-based services, other federal tax credits
Key technological components	Online screener/benefits calculator; online application that is printed and submitted on paper
Other key components	Outreach conducted by for-profit or nonprofit partners; application assistance
Target population	General low-income population

HelpEngen (formerly RealBenefits)

Description	HelpEngen, operated by TransEngen since 2008, is a web-based platform that
	allows health care, public, and community-based organizations to connect individuals to federal, state, and local benefits programs.
	Key features include (1) eligibility assessment: targeted screening for multiple
	programs simultaneously through a single online interview that runs 30
	minutes; (2) application preparation: generates completed hard copy applications for delivery to program offices and allows electronic submission of
	applications where accepted by state agencies; and (3) management
	information: real-time access to all cases filed as well as application status and
	history to help staff manage follow up.
	Most recently (in 2010), HelpEngen was implemented in CT as qualify4care.com
	and in Franklin, TN, through Passport Health Communications.
	Before HelpEngen was acquired by TransEngen it was known as RealBenefits
	and was a wholly owned subsidiary of the national non-profit consumer
	advocacy organization, Community Catalyst. Community Catalyst developed
	this web-based screening- and enrollment-assistance software in 2002, initially implementing it in Chicago. It had also developed (in the late 1990s)
	RealBenefits' predecessor, a benefits screening tool called MicroMax, and
	implemented that tool in Massachusetts and Rhode Island.
Key benefit programs	TANF, SNAP, Medicaid, CHIP, Medicare Extra Help, WIC, SSI/DI, LIHEAP, EITC
Other benefit programs	Prescription drug assistance, state low-income tax credits, Medicare Savings
	Program, state child care subsidy, Connecticut Breast and Cervical Cancer Early
	Detection Program

HelpWorks (see also Earn Benefits)

	•
Description	Community agencies use HelpWorks to both screen their clients for
	eligibility for multiple benefit programs and assist them in filing
	electronic applications. To use the computerized screening tool, clients
	must work with a trained benefit counselor who helps them learn about
	the benefits for which they may qualify and how to complete the
	application process. Jurisdictions that have online applications accept
	applications submitted electronically.
	HelpWorks, developed by Peter Martin Associates (PMA), was purchased
	by Affiliated Computer Services (ACS) in 2003. ACS licensed the
	HelpWorks software to Seedco, which marketed it for a few years
	alongside other services under the name EarnBenefits. In 2006, Lagan, a
	customer relationship management software vendor, acquired all of PMA—including HelpWorks—from ACS.
Key benefit programs	TANF, SNAP, CHIP, federal child care assistance
Other benefit programs	None known

MassResources.org

This website's general benefit screener identifies a broad range of programs for which users may be eligible. Because some programs have complicated eligibility rules, users may also complete a more specific eligibility check for each program in which they are interested and for which the benefits screener suggests they may be eligible. The eligibility check provides a more definite (but still unofficial) indication of eligibility. For certain programs, users may skip the benefit screener and proceed directly to the eligibility check. An eligibility check for each program in the effort is built into the system. Users submit applications for benefits separately.

MassResources.org, implemented statewide in 2003, was developed by Community Resources Information, Inc. (CRI), a nonprofit whose mission is to develop websites that provide comprehensive information on state and local resources relevant to low- and moderate-income families and individuals of all ages. The predecessor of MassResources.org was a local website for the city of Worcester, WorcesterResources.org, implemented in 2001. The local and statewide efforts operate in the same way.

CRI licenses the MassResources.org as a template to not-for-profit organizations in other states. The license is provided to one organization (or a partnership of organizations) per state. CRI oversees the hosting of the website but leaves it to the licensee to develop and operate the new site. This approach was used in New Mexico, leading to the www.NewMexicoResources.org. This website does not include a benefit screener, and an eligibility check is available for SNAP only. It is not built into the system but provides links to eligibility screening tools hosted on other websites (such as YesNM or USDA's SNAP Eligibility Screening Tool).

Key benefit programs

TANF, SNAP, Medicaid, CHIP, Medicare Extra Help, WIC, SSI/DI, LIHEAP, EITC, school meal programs, federal housing assistance programs, veterans' pension assistance

Other benefit programs

One-e-App		
Description	Developed by the California HealthCare Foundation and licensed to Social Interest Solutions, One-e-App provides one electronic application that collects and stores information, screens and delivers data electronically, and helps families enroll in a range of public and private programs. First implemented in Arizona in 2001, it is used under the following names in the following states: One-e-App in CA and IN, Health-e-Arizona in AZ, and Healthy Maryland in MD. The tool promotes access to different sets of programs in each state.	
	CA and AZ offer an assisted model and a self-service model. In the former, staff at nonprofit organizations uses the tool to screen families and help them apply for benefits. The general public has access the latter. In MD, the assisted model is available, and a self-service model is in development. In IN, only the assisted model is available.	
	In AZ, the state adopted One-e-App as its sole effort to promote benefits access through web-based technology. In other states, One-e-App supplements other government efforts.	
Key benefit programs	TANF; SNAP; Medicaid; CHIP; WIC; LIHEAP; EITC	
Other benefit programs	Medicare Savings Program	
Key technological components	Online application that can be sent electronically; online screener/benefits calculator	
Other key components	Application assistance	
Target population	General low-income population	
Geographic reach	Multiple states/localities	
State/s (abbreviation)	AZ, CA, IN, MD	
Locality (cities or counties)	In AZ and IN, One-e-App is statewide.	
	In MD, it is available in Howard County and is in the process of being implemented statewide.	

In CA, One-e-App is used in 14 counties: Alameda, Fresno,

Humboldt, Los Angeles, Napa, Orange, Sacramento, San Diego, San Francisco, San Joaquin, San Mateo, Santa Clara, Santa Cruz, Sonoma

Online Training and Benefits Eligibility Tool (OTBET)

Description OTBET is hosted by PathWays PA, a nonprofit organization that provides

services and advocacy for women, children, and families. This online tool, implemented in 2010, allows staff and clients to determine their

personal self-sufficiency standard and benefits eligibility. Once eligibility is determined, staff and clients use links to connect to the state's online application tool, COMPASS, and other programs that

clients may find useful.

Key benefit programs SNAP, CHIP, LIHEAP, federal child care assistance

Other benefit programs None known

Key technological components Online screener/benefits calculator

Other key components Outreach conducted by for-profit or nonprofit partners

Target population General low-income population

Geographic reach Statewide

State/s (abbreviation) PA

Locality (cities or counties)

OregonHelps!

Description	OregonHelps! is an online prescreener for multiple benefits. Available to the public, it links to information about each program it screens for. It was developed and initially implemented in 2002 in Oregon by Multnomah County, Clackamas County, Oregon Food Bank, the state of Oregon, and the Community Action Directors of Oregon in consultation with EcoNorthwest. As part of its Work Advancement and Support Center Demonstration, MDRC worked with EcoNorthwest to modify OregonHelps! to better meet the needs of the demonstration. The result, the Work Advancement Calculator, added the capability to quantify the changes in income that would result from specific advancement moves,
	taking into consideration the loss of work supports and the increase in taxes.
	Oregon then franchised Oregon Helps! to NJ (where it is known as NJHelps), AZ (where it is known as ArizonaSelfHelp), Los Angeles County (where it is known as LACountyHelps), and the United Way of Greater Kansas City which serves Kansas and Missouri (where it is known as Kansas City Helps). The benefit programs to which the site promotes access are tailored to each state. And, in each state, the site links either to printable or online applications either for single programs or multiple programs.
Key benefit programs	TANF, SNAP, Medicaid, CHIP, Medicare Extra Help, WIC, SSI/DI, LIHEAP, EITC, school meal programs, federal housing assistance programs, federal child care assistance
Other benefit programs	General Assistance, prescription drug assistance, state low-income tax credits, County- or city-level human services assistance programs, Unemployment Insurance, Medicare Savings Program, long-term care, home- and community-based services, state child care subsidy, Head Start
Key technological components	Online screener/benefits calculator
Other key components	None known
Target population	General low-income population
Geographic reach	Multiple states/localities
State/s (abbreviation)	AZ, KS, MO, NJ, OR
Locality (cities or counties)	Statewide in AZ; Kansas City, KS and MO; Statewide in NJ; Statewide in OR

ParentHelp123

Description Online application multiple benefits. ParentHelp123.org is managed by

WithinReach, a Seattle-based nonprofit organization that provides benefit outreach and advocacy throughout the state of Washington.

Along with an online application, the website includes an area for

providers that explains how to help customers learn more about benefits

for which they may be eligible, and shares information on program eligibility rules. People wanting help in using this online service may also

contact WithinReach through a toll free hotline.

Key benefit programs TANF; SNAP; Medicaid; CHIP; WIC

Other benefit programs General assistance

Key technological components
Online application that can be sent electronically

Other key components Outreach conducted by for-profit and non-profit partners; application

assistance

Target population Families with children

Geographic reach Statewide

Real Choices Hawaii

Description

This website for Hawaiians in need of disability services or long-term care includes 4 components: (1) "services," which provides online access to program applications; (2) the Benefits Finder, which is an online screener; (3) "learn about," a series of links to program information and resources; (4) "my choices," a login area that allows users to retain their data for pre-filling other application forms later; and (5) "community," a forum and discussion area.

The Benefits Finder, which was added to the Real Choices website in 2010, is powered by the National Council on Aging and uses AssistGuide, Inc. (AGIS Network) products. The effort is supported through two grants—one from CMS) and one from DOL's Employment and Training Administration. While the site is accessible to people of all ages and abilities, it caters to seniors and individuals with disabilities.

In Louisiana, AGIS Network has launched a similar effort (https://www.louisianaanswers.com/site/1/home.aspx), which includes online resource information and links to program applications that can be printed.

Key benefit programs TANF, SNAP, Medicaid

Other benefit programs None known

Key technological components Online application that is printed and submitted on paper, online

Seamless Compassion

Seamiess Compassion	
Description	Developed by Efficient Forms and implemented in Colorado in 2009, Seamless Compassion is a web portal to begin the application process
	for multiple benefit programs. Interactive interview software walks users
	through a series of questions to screen them for eligibility and then
	generates pre-filled forms that can be submitted to apply for benefits.
	The data collected during the screening and application process is
	capable of interfacing with eligibility determination systems after the
	application is submitted.
Key benefit programs	SNAP, Medicaid, CHIP, SSI/DI, LIHEAP
Other benefit programs	None known
Key technological components	Online application that can be sent electronically; online application that is printed and submitted on paper, online screener/benefits calculator, application and eligibility systems integration
Other key components	None known
Target population	General low-income population
Geographic reach	Statewide
State/s (abbreviation)	СО
Locality (cities or counties)

Note: Seamless Compassion was recently launched in the Des Moines public schools to promote access to free and reduced-price school meals.

Single Stop USA

_	
Descri	ıntınn
DESCH	IDLIDII

Single Stop USA has combined two efforts in New York City to streamline access to benefits: the Benefits Enrollment Network (BEN) and The Food Stamp/Medicaid Paperless Office System (POS).

BEN is an online screening tool that can determine which benefits clients are eligible for in as little as 15 minutes, guide them through the application process, and connect them to other services, including benefits counseling, free tax preparation, legal assistance and financial counseling. Benefit counselors have direct access to the screening tool; clients work with them to be screened for benefits and to get information about how to complete applications for the programs for which they may qualify.

POS is a joint effort between the Human Resources Administration (HRA), the Robin Hood Foundation, Single Stop USA, and the Metropolitan Council on Jewish Poverty (Met Council) to increase SNAP and Medicaid enrollment among Single Stop customers. This effort, piloted in 2005 and launched more broadly throughout New York City in September 2008, allows clients to electronically submit a joint SNAP-Medicaid application in Single Stop locations throughout the city with help from Single Stop staff trained to use BEN. The staff complete the documents, gather the documentation, and transmit the applications and documentation to local SNAP centers, which then conduct the interview and determine eligibility. A Microsoft-based eligibility determination platform supports the application data submitted by through this method.

Single Stop USA was originally launched with funding from the Robin Hood Foundation and incorporated as a nonprofit in 2007. With grant funding from The Atlantic Philanthropies, BEN was expanded to other cities (the San Francisco Bay Area; Miami; Newark, NJ; and Las Cruces and Farmington, NM) beginning in 2009.

Key benefit programs

SNAP, Medicaid, CHIP, WIC, LIHEAP, EITC, Federal housing assistance

programs, Federal child care assistance

Other benefit programs

State and local low-income subsidies

Key technological components

Online application that can be sent electronically

The Benefit Bank

	The Benefit Burns
Description	The Benefit Bank (TBB) is a web-based program offering assistance from counselors who help individuals and families access food, health care, tax, and community social supports. The effort was developed by Solutions for Progress, a Philadelphia-based nonprofit organization. A version of TBB was initially implemented in Pennsylvania in 2002 and in its current form in 2005. A separate version of this tool, called The Benefit Bank Self Serve, is a self-service web-based tool that enables individuals and families in all states to file their federal taxes.
	In each state where TBB operates, benefit counselors at a range of service organizations (the United Way, faith-based programs, etc.) walk clients through the screener. Solutions for Progress tailors the tool to provide access to a specific (and varied) range of benefits in each participating state. Each state has a main affiliate organization that is responsible for local training of TBB counselors and deploying the effort across multiple organizations that typically work with low-income individuals and families. In many states, the screening tool interfaces directly with state and local online applications for benefits, and where it does not, the benefit counselors provide referrals and application assistance as needed.
	An effort to disseminate TBB nationally, called the Work Supports Initiative (WSI), is sponsored by MDC (www.mdcinc.org) and operates through state affiliates consisting of one or more nonprofit organizations that use TBB to conduct outreach. State affiliates receive strategic advice, training, coaching, and technical assistance from WSI's national partners.
Key benefit programs	TANF; SNAP; Medicaid; CHIP; Medicare Extra Help; WIC; SSI/DI; LIHEAP; EITC; School meal programs; Federal child care assistance
Other benefit programs	Prescription drug assistance; Property tax and rent rebate programs; State low-income tax credits; Medicare; Medicare Savings Program; FAFSA; Voter registration; State childcare subsidy
Key technological components	Online application that can be sent electronically; screener/benefits calculator
Other key components	Outreach conducted by for-profit or nonprofit partners; application assistance
Target population	General low-income population
Geographic reach	Multiple states
